Ajara Torikoh, Badagry, Lagos

Dear Sir,

Review and Testimonial for Sejfarms Consults Limited

I hope this message finds you well. Thank you for reaching out to request a review and testimonial regarding our collaboration with Sejfarms Consults Limited. It has been a pleasure working together to provide meaningful internship and training opportunities for our students at the Federal University of Agriculture, Abeokuta (FUNAAB).

The Department of Aquaculture and Fisheries Management of the Federal University of Agriculture, Abeokuta expected your programs to offer practical, hands-on experiences that align with the theoretical knowledge our students gain in Aquaculture and Fisheries Management coursework. Interestingly, your internship and training programs met our expectations. The structured and well-organized sessions, regular presentations and assessments ensured that students gained significant exposure to real-world challenges in aquaculture and related agribusiness.

Our students have developed critical skills, including advanced fish farming techniques, fish value addition skills, aquaculture related agribusiness management, problem-solving, and teamwork. Many have also reported an enhanced understanding of sustainable farming practices, which is invaluable to their future careers. The collaboration has equipped our students with practical knowledge and boosted their confidence in applying theoretical concepts. It also strengthens FUNAAB's reputation as an institution that provides industry-ready graduates through quality partnerships.

Moreover, we believe incorporating mentorship sessions or follow-ups with interns after their training could further enhance the impact of your programs. Additionally, workshops focusing on emerging trends in agriculture technology would be a welcome addition.

We deeply appreciate the efforts of Sejfarms Consults Limited in nurturing future agricultural professionals and look forward to continuing this beneficial partnership.

Thank you, for your dedication to excellence.

Kind regards

ABDULRAHEEM, Ikililu (PhD)
Ag. Head of the Department of Aquaculture and Fisheries Management
College of Environmental Resources Management
