Mr. Sejiro Michael Oke-Tojinu

SEJFARMS CONSULTS LIMITED, Badagry

Dear Mr. Sejiro,

RE- REQUEST FOR REVIEW AND TESTIMONIAL

I am delighted to provide a review and feedback on the experience of our department's interns and 500-level students when your farm was visited.

The review provided by our students who interned on your farm for six months inspired the excursion to Sejfarms. The interns spoke so highly about the available facilities in fish production and processing; their excitement showed they had enjoyed a good blend of education, hands-on learning, mentoring and fun. The visit to your farm was also informative and engaging as the students were exposed to the entire value chain of aquaculture production. We attest to Sejfarms as a model of innovation and efficiency showcasing innovative techniques and facilities in fish production with carefully crafted sections and ponds. At this juncture, I appreciate the opportunity to bring many students to your farm; not many farms would be obliged. We are also grateful for the warmth and enthusiasm with which the entire team was welcomed; it was obvious that the team at Sejfarms is deeply passionate about aquaculture and fish production.

During my interaction with the students on the excursion, I observed they gained practical, hands-on knowledge on fish hatching, feeding, harvesting, and catfish processing; and the knowledge of the lecturers who accompanied them was equally refreshed. Your stimulating parting charge, which drew on your travails and triumphs as an aquaculture entrepreneur, also strengthened the students' love and resolve for the industry.

The students left Sejfarms feeling informed, inspired and motivated to explore the vast opportunities in aquaculture.

Once again, on behalf of the interns and the team that visited Sejfarms, I sincerely appreciate your thoughtful gesture and hope that our requests for student internships and farm visits in the future will always be approved.

Sincerely yours,

Dr. Oluwagbenga O. OLUDE
